

WASEDA Carbon Net Zero Challenge 2030s Roadmap

*About Scope 1-3 Emissions

Scope 1-3 Emissions are a standard for calculating and reporting greenhouse gas emissions. The standard covers greenhouse gas emissions from business's supply chains, and was established by the GHG Protocol Initiative, an international organization. Greenhouse gas emissions fall into the following three categories.

Scope 1 Emissions: Direct emissions from the operating entity

Scope 2 Emissions: Indirect emissions from the use of electricity, etc. supplied by other companies

Scope 3 Emissions: Other indirect emissions related to the activities of the operating entity
